

Check Personalization

Made in the USA

Mx-4lx MICR Encoder

Enhance your CHECK PROCESSING services.... with Maverick's new Mx-4lx series Endorser MICR encoder.

The Mx-4lx can personalize the front of a document and encode MICR characters in one single pass. MICR impact printing improves document security and legibility providing documents with accurate and consistent quality. This helps reduce check fraud and improves overall check processing efficiency and customer service.

We designed the Mx-4 series to be a plug & play replacement for Maverick's M4 series encoders but now you can also create personalized counter checks in the language and font of your choice. Available with both E13b and CMC7 MICR fonts.

The Mx-4lx allows you to process over 70 dpm MICR encode only and up to 40dpm MICR encode and multiple zone personalization. With state-of-the-art Arm Processor electronics, built-in autofeed, and catch tray, the Mx-4lx is the least expensive and most compact Personalization MICR encoding system in the market today. So if you are looking for a MICR encoder that is capable of personalizing documents and counter space is an issue, consider the new Mx-4lx.

Mx-4lx

FEATURES

- **Simple Micr** (PC Software)
- Exception Field Encode
- Full Field Encode
